World
Since **2006**

About Us

As Sarıkaya Narenciye, we have launched our new and modern Citrus Packaging Facility in 2006 to take place in the world's most challenging markets such as Asia and Europe. Today, Sarıkaya products meet with customers in many countries such as England, Italy, Netherlands, Poland, Ireland, Hungary, Czech Republic, Serbia, Bosnia and Herzegovina, Croatia, Latvia, Lithuania, Canada and India. As Sarıkaya, we continue to grow by breaking records every year in our country's citrus, vegetable and fruit exports.

We pack and export citrus fruits, vegetables and fruits that have been grown with care in our advanced facilities, which have all the possibilities of technology. We have a large machine park and a total of 22 cold storage warehouses in our two facilities, which are established on a total of 12.000 m² closed and 15.000 m² open area. We continue our work in Mersin-Tarsus, in a total area of 18.000m², including open and closed areas. Our company benefits from state-of-the-art machinery with a working capacity of 20 tons/hour. Today, we continue to export 50,000 tons of citrus fruits and 5,000 tons of vegetables, with 10 kg and 15 kg plastic crate manufacturing and netting machines capable of net packaging from 0.5 kg to 5 kg, and 15 cold storages with a total capacity of 2,000 tons. In our Manisa-Alaşehir facility, we serve with a daily capacity of 50 tons of pomegranate, grape and cherry processing, with 7 cold storages on a total area of 9.000 m².

Quality

With our Sarıkaya company, we work with all our customers all over the world in quality and confidence. With our brand, which has a deep knowledge of the agricultural products we export, we focus on every detail and carry out our exports with our expert teams. We take advantage of every opportunity with our customers and stakeholders with our sustainable service that we offer in packaging together with a superior quality. By increasing our quality day by day, we standardize the continuity, control and compliance of quality management systems. We are constantly increasing our exports by improving our service and the quality of our production. We aim to reach them by adopting customer satisfaction, which is among our primary goals, as a principle, and by planning our periodic goals.

Lemon

Sarikaya exports the best quality lemons grown in the Mediterranean region by packaging them in its facilities equipped with the latest technology, together with the years of experience.

Lemon which is a type of citrus, is a plant that has survived to the present day as a result of hybrid formation. Lemon is not a purebred tree species, it is formed by the hybridization of orange and citron, and is among the plants with its own characteristics. The main feature of lemon is that it contains citric acid and 2.2 pH, by leaving a sour taste on the palate.
